how to the new wave

products ghd curve™ creative curl wand, ghd style curl hold spray, ghd style final fix hairspray, ghd detangling comb & sectioning clips

step 1 Select parting, section hair from crown to ears clipping away back section. Take a diagonal section 4cm above the ear and spritz with ghd style curl hold spray.

step 2 Keeping the hair flat, place the ghd curve™ creative curl wand under the section and wrap hair from the base of the barrel towards the cool tip, creating volume at the root.

step 3 Hold for 5-8 seconds then unwrap the section. Leave to cool. Continue this technique, working upward towards the parting on both sides.

step 4 Unclip the back section. Taking diagonal sections towards the centre nape on either side of the head, use the same technique as previously to complete.

step 4 Shake out the curls using your fingertips then use the ghd detangling comb to dress out the look finishing with a fine mist of ghd style final fix hairspray.

ghd curve™ has been designed by our team of ghd scientists to give you the good hair day that you deserve. Visit ghdhair.com/curve
