ghd curve

# how to hollywood waves

**products** ghd curve™ classic wave wand, ghd style curl hold spray, ghd style final fix hairspray, ghd detangling comb & sectioning clips

**step 1** Select your desired parting, section hair from crown to ears. Take a horizontal section of approx 4cm above the ear and spritz hair with ghd style curl hold spray.

**step 2** Starting at the front take a vertical subsection approx 2cm wide, hold the ghd curve™ classic wave wand on a slight diagonal to the section and gently wrap the hair around the barrel, starting from the base towards the cool tip.

**step 3** Hold for 5-8 seconds then gently release the hair and leave to cool. Follow this sectioning pattern upwards to the parting on both sides.

**step 4** Continue with the same sectioning pattern throughout the back of the head, starting from the nape working upwards to the crown to complete.

**step 5** Use a ghd detangling comb to loosen the waves and dress out the look, finishing with a fine mist of ghd style final fix hairspray.

ghd curve™ has been designed by our team of ghd scientists to give you the good hair day that you deserve. Visit [ghdhair.com/curve](http://ghdhair.com/curve)
