# how to perfectly polished

**products** ghd aura, ghd style total volume foam, ghd final fix hairspray, ghd detangling comb, ghd ceramic vented brush, ghd oval dressing brush & sectioning clips

**step 1** Apply total volume foam. Using ghd aura™ without nozzle, start to dry hair with your fingers, lifting and directing airflow into the root then down to ends.

**step 2** Blow dry top using a ceramic vented brush, lifting and directing airflow at root. Continue down slowly rolling hair upwards. Set with cold shot. Pin into a barrel curl.

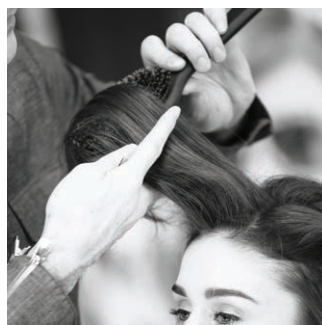

**step 3** Working side sections, place the aura heat setting onto medium heat and tame any unruly hairs around the hairline, directing the hair away from the face.

**step 4** Blow dry the sections either side of the head following the same process as step 2 but take the sections on a diagonal 45 degree angle away from face.

**step 5** Working at the back starting at the nape take horizontal sections working upwards to the front until the whole head is set and pinned into barrel curls.

**step 6** Once the hair is cool, release barrel curls and tease at roots slightly with a ghd oval dressing brush. Smooth out to the ends to create desired look.

ghd aura™ has been designed by our team of ghd scientists to give you the good hair day that you deserve. Visit [ghdhair.com/aura](http://ghdhair.com/aura)
