ghd[®]aura

how to statement volume

products ghd aura, ghd style root lift spray, ghd final fix hairspray, ghd detangling comb, ghd ceramic vented brush, sectioning clips

step 1 Apply root lift spray. Using ghd aura™ without the nozzle, start to dry with your fingers, lifting the hair, directing the airflow into the root area

step 2 With the nozzle back on, use a ghd vented ceramic brush and direct the airflow from roots to the ends. Roll the hair around the brush back towards the head, heating the hair as you roll. Use the cold shot button to set. Unwrap the hair, back brush lightly at the root then wrap into a barrel curl and pin.

step 3 take vertical sections directing away from the face and repeat previous step to complete the sides and back of head wrapping and pinning each section

step 4 taking horizontal sections back to the crown, elevate each section vertically and direct the nozzle into the root area for extra lift.

step 5 Upin each section, gently tease at the root and spritz with hairspray. Shake out with hands then use fingers to dress out to desired finish.

ghd aura™ has been designed by our team of ghd scientists to give you the good hair day that you deserve.
