how to tousled luxe

products ghd curve™ soft curl tong, ghd style curl hold spray, ghd style final fix hairspray, ghd oval dressing brush, hair pins & sectioning clips

step 1 Select desired parting, section from crown to the ears and clip away from sections. Take a horizontal section approx 4cm deep across the head and lightly mist with ghd style curl hold spray

step 2 Taking a horizontal subsection, flat wrap the hair around the barrel of the ghd curve™ soft curl tong, from base to tip, securing the ends with the clamp.

step 3 Hold for 5-8 seconds, gently unwrap the hair, backcomb slightly at the root then loop hair around two fingers and pin hair at the root.

step 4 Repeat, working upwards in horizontal sections to the front. For extra volume at the top, backcomb the roots slightly before using the tong.

step 5 Leave the hair to cool and set. Unpin curls, lightly mist with ghd style final fix hairspray and brush through using a ghd oval dressing brush.

ghd curve™ has been designed by our team of ghd scientists to give you the good hair day that you deserve. Visit ghdhair.com/curve

ghd good hair day, every day
